M. Mohapatra LEC - 1 Analog communication Techniques

Text Book - H. Taub, Schilling.

An overview of Electronic communication Systems :-

→ only a few hundred years back we were dependent only one physical mode of communication i.e Some one hade to carry the message physically from one place to another.

- The speed of transmission was severely limited, cost huge and reliability of service poor.
- But now situation is different, we can't imagine a world without TV, radio, telephone, mobile, fax, internet & debit card etc.
- Today we use electronic communication system by which signal moves with the speed of light from source to destination.
- Click of mouse we get details what we want, click remote to switch to a favourite TV channel, see a live match, how people are rescued after tsunami, press few buttons & connected to our near & dear within seconds all over the world.
- So, now questions to our mind that how communication is made and what technology behind it.
